

HFHAS MISSION actively promotes fair and good health across the globe and specifically among the Middle East and African Communities; supporting in financing poor individuals & refugees; organizing workshops, seminars, lectures, publish journals, and other periodicals as well as exchange programs (fellowships), as its contribution towards empowering and improving the skills of Young Healthcare members of each society; developing and fostering alliance with related national and international organizations and NGOs.

Major HFHAS project was delivered in Lebanon, supporting the renovation of the Rosary Sisters Hospital. The Hospital property and some staff suffered serious damage after the explosion in Beirut on 04 August 2020.

The Rosary Sisters Hospital is a 200-bed hospital in the Gemmayze neighborhood of Beirut with 160 employees and 140 physicians. The Hospital location is near the port of Beirut, less than 500 meters from both detonations of explosives. It is well known in the region to be a Catholic Humanitarian Mission supervised by the Holy See.

Led by Prof Dr Peter Messmer, President of HFHAS, the first container of supplies was delivered with medical goods for the first shipment to Beirut

Donors to the Containers
(alphabetical order):
